

**The result of Grigori Grabovoi.
Testimony of Ladichenko Marina.
Restoring the son's health
in one session from the diagnosis
of stage 4 lymphosarcoma
with a bone marrow lesion of 40%**

I, Ladichenko Marina Valerievna, testify that Grigori Petrovich Grabovoi, had restored health of my son, who was diagnosed with IV stage lymphosarcoma, with 40% bone marrow damage at the Kashira Cancer Center, in just one session.

The diagnosis were established on the basis of the laboratory and instrumental examinations and bone marrow punctures.

Additionally, there was performed ultrasound diagnosis of the chest.

After the meeting, conducted by Grigori Petrovich on 11 November 1997, 14 November 1997, puncture of the bone marrow and spinal cord was taken.

Conclusion: the absence of tumor cells. After that, ultrasound diagnosis of the chest, laboratory and instrumental examinations were carried out.

The conclusion of the doctors: the normal state of health of the child. All tests before and after the session were conducted by the same specialists on the same equipment.
