

**The result of Grigori Grabovoi.
Testimony of Buza Vladimir
Health recovery.
Diagnosis: cancer of head or pancreatic
with germination
into the 12 duodenal ulcer.**

I, Buza, Vladimir Georgievich, certify that I had contacted Grigori Petrovich Grabovoi about my illness with a diagnosis: cancer of head or pancreatic

with germination into the 12 duodenal ulcer.

I was diagnosed at Moscow Research Institute of Diagnostics and Surgery on the basis of a study, a histological study conducted on 4th December, 1996, research number 16789-92, and cytological research No. 2448687/96.

After contacting Grigori Petrovich Grabovoi on December 25, cancer of the head of pancreatic with further germination into the duodenal ulcer was actually cured in ONE session.

Evidence of the recovery from cancer of head of pancreatic with further germination into the duodenum was confirmed at the same clinic: Moscow Research Institute of Diagnostics and Surgery, located at the address: ul. Profsoyuznaya, 56, on the basis of histological research No. 465-68 / 97 and cytological research No. 879/97. Extract dated January 29, 1997.

Thus, I repeat once again that I was cured from cancer of head of pancreatic with germination into the duodenum 12 by Grigori Petrovich Grabovi, in ONE session.
