

## **To all the persons interested**

The Protocol of observation of operation of the artificial intelligence function of the Device of development of concentrations of eternal life PRK-1U with three modes.

According to the scientific-practical research of the characteristic that in the Device of development of concentrations of eternal life PRK-1U with three modes the artificial intelligence functions for providing for eternal life for everyone are being realized, thus under circumstances of overloading, it can transfer into some of the modes, and then the device functions can be restored upon analogy with a living organism - this Protocol has been composed. (The object of the research - PRK-1U with three modes, obtained under the Sublicense Agreement № P18966764)

Having withdrawn the PRK-1U device for the development of concentrations on eternal life in October 2018, after just 2 or 3 months it was no longer possible to activate the 2nd mode, the device worked in either first or third mode.

After consulting the Belgrade Center, I was asked to film the anomaly, which I managed to do after many attempts: in fact, while I was trying to film the anomaly it did NOT show up anymore (i.e. the second mode worked!), succeeding only after many attempts. Subsequently, this anomaly continued all the time, until a new anomaly was shown on the occasion of an experiment carried out in collaboration with a physics professor at the University of Naples interested in the operation of the device. This trial (lasting 1 month) was aimed at recording the effect of the device on distilled water samples. On this occasion, the device would shut down by itself and repeatedly, for no apparent reason. Subsequently, the device continued to present this anomaly immediately after the first wave of the Covid-19 pandemic during which it was switched on 24 hours a day without any problem (always and only in third mode, the first anomaly of non-functioning of the second persisting mode). From August-September 2020, the second anomaly occurred with greater intensity, for which the device did not stay on for more than a few minutes (here too there is a video illustrating it sent to Belgrade). Finally I decided to request a replacement as the device could only remain in operation for a few seconds.

At the beginning of July 2021 I received the new device (P18966764.1) which works regularly.... until September 30th! On the afternoon of September 30th while I was doing meditation I heard a noise in the room (where the device was turned on in third mode) as if something fell on the floor and rolled. At a first inspection there was nothing strange, only after a while I realized that the device was NOT working anymore, not showing any signs of life anymore .... The lights of the switches do not come on in any way (even now). Also on the evening of September 30th while I was at dinner another strange occurrence happened: the lights in the room started to flash just the same way as the device when it is in third mode, and they flashed for several minutes like this (there is a short video of the phenomenon). I have the distinct feeling that all this is in relation to the very intense work of meditation, controlling and prayer that I have been carrying out for months for the global situation with and without the aid of the PRK-1U device that I still used to keep on in third mode. I would like to clarify that during all these months and despite all the events not exactly in the Norm that have happened and continue to happen in reference to the pandemic situation and the restriction of freedoms, I have always managed to maintain a very positive and centered vision and indeed I have often found having to transmit to others the need to maintain this state of inner

harmony. I must add another thing ... this really inexplicable: a few days after the episode described, a crepuscular light bulb that I have in the bathroom (socket light bulb with crepuscular function) and which is therefore on at night began to go out when I enter bathroom (with lights off and at night) when I am about 60 cm from it and it turns on again if I move away, it also happened this night. Furthermore, strange electrical problems persisted in the house, just yesterday having turned off the general power supply panel, 2 light bulbs in the house continued to be on (one of which flashed 2 or 3 times).

The device is still NOT working (it does not turn on at all), I remain confident that it can "miraculously" restart, since at this point it seems clear to me that the device has real artificial intelligence.

Integration to the Protocol for the observation of the operation of the artificial intelligence function of the Device for the development of concentrations for eternal life PRK-1U with three modes, from October 2018
