

To all the persons interested

The Protocol of observation of operation of the artificial intelligence function of the Device of development of concentrations of eternal life PRK-1U with three modes.

According to the scientific-practical research of the characteristic that in the Device of development of concentrations of eternal life PRK-1U with three modes the artificial intelligence functions for providing for eternal life for everyone are being realized, thus under circumstances of overloading, it can transfer into some of the modes, and then the device functions can be restored upon analogy with a living organism - this Protocol has been composed. (The object of the research - PRK-1U with three modes, obtained under the Sublicense Agreement №P171001).

On May 17, 2019, at 17:35 p.m. by local time, I arrived in Tokyo. I was supposed to stay there for 24 hours, since the airplane to Tahiti was to take off on the following day, at 17:40 p.m. by local time.

I spent the night at the hotel, close to the airport. For certain reasons, from the moment of exiting the transit area of the Narita Airport, and until I came back to the airport on the following day, I experienced continuous and very intensive emotions, among which, I felt a very intensive fear, worry, lack of self-confidence, perplexity, a specific evaluation of what was happening. I haven't experienced such a condition in many years.

When I arrived at the hotel, the first thing I did, was turning on the PRK-1U device. For me, it was a very strange experience to observe what was happening. Until that moment, the device had always been operating neatly according to the protocol. I.e. there had never been any failures on turning the first mode on. And there, on turning the first mode on, the indication of the red button blinked continuously. Usually, after turning the first mode on, the indication of the red button blinks three times, and then the stabilized first mode of the device operation is established. I pressed the green button, the device transferred into operation in the third mode. And no matter how much I've tried to transfer the operation of the device, by switching the buttons, into the second mode, in which I very much like to work, the device hasn't responded. I had to leave the device to operate in the third mode for the whole night.

In the morning, I once again tried to switch the device to the second mode, but with no result.

When I came back to the airport, I had to wait for the airplane for 5 more hours, and I continued to think about the information which had arisen very intensive negative emotions in me. And suddenly, a miracle happened! I got an insight of the situation from a completely different aspect. And I understood, that all of my worries were with no real basis. That was the information of my previous experience, perhaps not even of mine only, but of the collective consciousness' also. Within 5 minutes, the haze dispersed, and a perfectly normal state appeared in me, and also a clear understanding of the absolute safety and harmony of what was happening.

As I arrived in Tahiti, when I turned the device on, the device was operating perfectly normal again. All modes were turned on according to the protocol.

Possibly, the very intensive negative thoughts and negative emotions of mine were the reason for overloading of the device, and it could cope with that information only in the third mode, which amplifies the dynamic phase of reality.
